

PROSLIDE ENGINEERED TOPDRESSING

Once the foundation of your infield has been properly engineered or modified with **DuraEdge® Engineered Soils**, knowing which topdressing to use is the next big decision. The topdressing that you select for your infield is the true playing surface where the game takes place.

DuraEdge Products, Inc. is pleased to announce our new product, **ProSlide™ Engineered Topdressing**, a professional grade expanded shale topdressing. ProSlide™ helps you to make your infield play *more* games, play *safer* games, and *easier* to maintain!

- **ABSORPTION:** Manages the moisture of your infield by providing a barrier to slow the evaporative process from the base soils
- **DURABILITY:** Resistant to break down during use and maintenance which helps keep your infield surface playable and in place longer
- **GRADATION:** True 4x30 Classic and 6x30 Professional particle sizes create a smooth sliding surface and ensure more predictable bounces
- **APPEARANCE:** Color-fast nature enhances your infield's aesthetic appeal and provides contrast for tracking ball movement

ProSlide™ Engineered Topdressing was developed after years of studying the performance of the DuraEdge infield surfaces. Providing a long-lasting vibrant color under both wet and dry conditions, ProSlide™ creates a more resilient sliding surface during the hot, dry months of the playing season.

ProSlide™ is available in 50 lb bags, 2000 lb and 4300 Supersacks, and Bulk.
